Lane Keep Assist System for Chevrolet Blazer Feb 18 2020 This thesis presents the design process of a lane keep assist (LKA) system for a hybrid electric vehicle, Chevrolet Blazer. The vehicle is implemented with a P4 Split-Parallel hybrid architecture, the vehicle's front axle is powered by a GM 2.0L I-4 Turbo engine coupled with a 9-spd automatic transmission and an eRAD motor is used to propel the rear axle. The primary goal of this thesis is to present the construction of a hybrid electric vehicle system model, the development of an LKA system, and the tests and validations of the system. The vehicle system is modeled according to the P4 Split-Parallel hybrid architecture first, and then the LKA system is developed based on the model predictive control algorithm. Afterwards, tests and simulations are conducted through the whole system, which is a combination of the vehicle model and the LKA system. The test results show that the LKA system has the ability to tracking a path with small errors, especially at low and medium speed.

A padded roll bar was introduced in 1974. About 83% of vehicles were built with automatic gearboxes. In 1979 it acquired a catalytic converter and a single exhaust pipe. This is a compilation of road and comparison tests, technical and specification data, owners' survey, and suspension modifications. Principles of Flight Sep 19 2022 After narrowly surviving a plane crash, Bill Hatcher wakes up to discover his life of carefree abandon shattered. As a Peace Corps volunteer in Tanzania in the 1990s, he had risen above his own racial prejudices and religious jingoism, and yet had remained emotionally aloft, afraid to commit to the full transformation that was calling to him. In spite of misgivings, he returns to Africa. In Kenya, he flies bush planes, guides wilderness courses, and falls in love with a young Kikuyu woman. All seems well until Bill is attacked and beaten by thugs and then injured when he's chased by an elephant. Still unable to deal with reality, he escapes to Alaska, where he flies still higher and loves even more recklessly. Ultimately, the principles of flight force him to make a choice: to fly away again or finally return to Earth as an advocate for social, animal, and environmental justice. Set before, during, and after 9/11 and the wars that followed, and filled with spectacular scenes of flights over the African savanna and Alaskan glaciers, Principles of Flight is a memoir of grand adventure as well as a psychosocial inquiry into the hyper-masculinism that has dominated the world.
