From the Gulf to the Rio Grande Apr 22 2020

Decentralization and Development Partnership Sep 20 2022 Decentralization - an essential pillar of institutional reform - is of critical importance in developing countries, particularly in regard to democratization, effective development, and good governance. Uganda, since 1986 and the start of decentralization measures under Yoweri Museveni and the National Resistance Movement, has represented one of the most serious commitments in Sub-Saharan Africa. With the benefit of extensive fieldwork, Fumihiko Saito demonstrates how conflict resolution, information dissemination, and encouragement of the many and varied stakeholders to form partnerships are critical to successfully bringing services "closer to the people. Decentralization and Development Partnerships: Lessons from Uganda goes beyond theory to compare academic assumptions to the reality of decentralization implementation in modern Uganda. Although the process is by no means free of difficulties, Saito concludes that a "win-win" outcome is a real possibility.

Genius in the Background Jul 26 2020 Genius in the Background introduces brilliant chess that will be unfamiliar to even well-read chess players. Twelve chess stars are profiled with examples of their greatest achievements, but these stars are not famous they are geniuses who stay in the background. For example, Pervakov and Afek are not household names but they compose chess studies and puzzles of such elegance and cleverness that they deserve to be famous. The names of top players such as Garry Kasparov and Veselin Topalov may be famous to chess fans, but they did not become World Champions without great help two of their coaches are profiled in this book and provide insights into the education of a champion. A broad range of chess is covered by the twelve profiles from openings to endgames, puzzles to training. The common thread is beauty and brilliance that deserves to be better known."

The Method in Chess Mar 02 2021

The Dynamic Loss of Earth's Radiation Belts Jan 20 2020 The Dynamic Loss of Earth's Radiation Belts: From Loss in the Magnetosphere to Particle Precipitation in the Atmosphere presents a timely review of data from various explorative missions, including the Van Allen Probes, the Magnetospheric Multiscale Mission (which aims to determine magnetopause losses), the completion of four BARREL balloon campaigns, and several CubeSat missions focusing on precipitation losses. This is the first book in the area to include a focus on loss, and not just acceleration and radial transport. Bringing together two communities, the book includes contributions from experts with knowledge in both precipitation mechanisms and the effects on the atmosphere. There is a direct link between what gets lost in the magnetospheric radiation environment and the energy deposited in the layers of our atmosphere. Very recently, NASA's Living With a Star program identified a new, targeted research topic that addresses this question, highlighting the timeliness of this precise science. The Dynamic Loss of Earth's Radiation Belts brings together scientists from the space and atmospheric science communities to examine both the causes and effects of particle loss in the magnetosphere. Examines both the causes and effects of particle loss in the magnetosphere from multiple perspectives Presents interdisciplinary content that bridges the gap, through communication and collaboration, between the magnetospheric and atmospheric communities Fills a gap in the literature by focusing on loss in the radiation belt, which is especially timely based on data from the Van Allen Probes, the Magnetospheric Multiscale Mission, and other projects Includes contributions from various experts in the field that is organized and collated by a clear-and-consistent editorial team

From Divided Pasts to Cohesive Futures May 16 2022 Offers an insightful yet readable study of the paths - and challenges - to social cohesion in Africa, by experienced historians, economists and political scientists.

The Oxford Handbook of Lying Apr 15 2022 This handbook brings together past and current research on all aspects of lying and deception, from the combined perspectives of linguistics, philosophy, and psychology. It will be an essential reference for students and researchers in these fields and will contribute to establishing the vibrant new field of interdisciplinary lying research.

Behaviour Behind Bones Jun 17 2022 This book is the first in a series of volumes which form the published proceedings of the 9th meeting of the International Council of Archaeozoology (ICAZ), held in Durham in 2002. The 35 papers present a series of case studies from around the world. They stretch beyond the standard zooarchaeological topics of economy and ecology, and consider how zooarchaeological research can contribute to our understanding of human behaviour and social systems. The volume is divided into two parts. Part 1, Beyond Calories, focuses on the zooarchaeology of ritual and religion. Contributors discuss ways to approach questions of ritual and religion through the faunal record, and consider how material culture depicting and/or associated with animals can provide clues about ideology, religious practices and the role of animals within spiritual systems. Part 2, Equations for Inequality, looks at questions of identity, status and other forms of social differentiation in former human societies. Contributors discuss how differences in food consumption, nutrition, and food procurement strategies can be related to various forms of social differentiation among individuals and groups.

Leanings Oct 21 2022 An unforgettable collection of feature articles and columns from Cycle World magazine by master writer Peter Egan, whose simple adventures of life remind us all why we love to ride.

Dictionary of Minor Planet Names Jan 12 2022 The history and rapid development of minor planet discovery In addition to citing the bibliographic source of the names, the discoveries constitute a fascinating story and one with a ring, we also provide the source of numbering. A spe rather breathtaking evolution. By October 2005, the official concordance list will enable the evaluation of the total of numbered planets exceeded the remarkable respective publication dates. The complete work is, a cornerstone of 100,000 objects and only three years later of course, a thoroughly revised and considerably enlarged in November 2008 we are even faced with minor planet large data collection and every effort has been made () 200000 . This dramatic evolution must be compared to check and correct each single piece of information () with the huge time span of two centuries 1801-2000 again. For even more detailed information on the discovery that was necessary to detect and to refine the orbits of discovery circumstances of numbered but unnamed planets only the first 20,000 minor planets. Nowadays, we need less, the reader is referred to the extensive data files even less than 13 months for the same quantity! At the compiled by the Minor Planet Center. end of 2005, we had achieved a total of 12,804 named (According to a resolution of IAU Division III 2000, minor planets a fraction of less than 11 per cent of) Manchester IAU General Assembly DMPN attained all numbered minor planets.

Design & Applied Arts Index Dec 11 2021

L'Unité D'habitation Oct 29 2020 The Unite d'Habitation at Marseilles is a key building of the twentieth century, and a seminal work in Le Corbusier's oeuvre. A precursor of buildings in Nantes, Berlin, Briey-en-Foret and Firminy, it established, in built form, Le Corbusier's ideas of public housing that had existed only on paper for more than twenty-five years. David Jenkins argues that the Marseilles Unite stands out as a powerful and convincing testament of Le Corbusier's fundamental humanism and his faith in the principles of the Ville Radieuse and the Brutalist medium of rough cast concrete which in other, less able hands, have since been called into question.

The Road to Chess Improvement Oct 17 2019 In this exciting new book, a US Champion provides solutions to the real-life problem of improving one's chess. Grandmaster Alex Yermolinsky, one of the strongest players in the US, passes on many of the insights he has gained over years of playing and teaching, steering the reader away from 'quick-fix' approaches, and focussing on the critical areas of chess understanding and over-the-board decision-making. A large part of this book discusses a variety of important opening set-ups, including methods for opposing off-beat but dangerous lines, such as the Grand Prix Attack. This entertainingly written book breaks new ground in many areas of chess understanding.

The Diatom World Apr 03 2021 Diatom biology, genomics and ecology are becoming more relevant to the human species. While there have been recent compilations of some of the applied aspects of diatoms, and the dizzying pace of taxonomic revisions, this new volume brings us up to date on their classification, biology and ecology, as well as covering the topics of genomics and applied uses. In this collection, some of the leaders in diatom research present either new information or summarize recent research efforts on a wide range of topics, including the tree of life of diatoms, their classifications, the wide habitats and ecological spectra the group exploits, as well as the beauty of their form. This volume celebrates the diversity, emerging areas of research and fascinating ecology of the diatoms bringing this group of world-renown and emerging research leaders together. 'The Diatom World' will foster greater appreciation and research contributions on this incredibly diverse and fascinating group of organisms.

Toward an Architecture Sep 08 2021 Published in 1923, Toward an Architecture had an immediate impact on architects throughout Europe and remains a foundational text for students and professionals. This edition includes a new translation of the original text, a scholarly introduction, and background notes that illuminate the text and illustrations.

Industrial Design and Artistic Expression Nov 22 2022 The copyright/design interface for a wider, non-specialist audience, taking as a starting point the notion of industrial design derived from design studies, on the border between art and science.

Proceedings of the Ninth International Symposium on Cyclodextrins Feb 01 2021 This volume contains the proceedings of the Ninth International Symposium on Cyclodextrins, held in Santiago de Compostela, Spain, May 31 - June 3, 1998. The papers collected represent a summary of the last two years' achievements in the application of cyclodextrins in such diverse fields as pharmaceuticals, biotechnology, textiles, chromatography and environmental sciences. Highlights: Chiral selection of chemicals, nuclear waste management, cyclodextrins in nasal drug delivery, cyclodextrins in pulmonary drug delivery, cyclodextrins as pharmaceutical excipients, pharmacokinetics, stabilization of drugs by cyclodextrins, structural characterization of cyclodextrin complexes by nuclear magnetic resonance and molecular modeling, artificial receptors, large cyclodextrins, cyclodextrins as enzyme models, new cyclodextrin derivatives and potentials. Audience: This book will be of interest to researchers whose work involves biotechnology, pharmaceuticals, food and chemicals and chromatographic methods, as well as fundamental cyclodextrin research.

Biopolymers from Renewable Resources Dec 23 2022 Biopolymers from Renewable Resources is a compilation of information on the diverse and useful polymers derived from agricultural, animal, and microbial sources. The volume provides insight into the diversity of polymers obtained directly from, or derived from, renewable resources. The beneficial aspects of utilizing polymers from renewable resources, when considering synthesis, processing, disposal, biodegradability, and overall material life-cycle issues, suggests that this will continue to be an important and growing area of interest. The individual chapters provide information on synthesis, processing and properties for a variety of polyamides, polysaccharides, polyesters and polyphenols. The reader will have a single volume that provides a resource from which to gain initial insights into this diverse field and from which key references and contacts can be drawn. Aspects of biology, biotechnology, polymer synthesis, polymer processing and engineering, mechanical properties and biophysics are addressed to varying degrees for the specific biopolymers. The volume can be used as a reference book or as a teaching text. At the more practical level, the range of important materials derived from renewable resources is both extensive and impressive. Gels, additives, fibers, coatings and films are generated from a variety of the biopolymers reviewed in this volume. These polymers are used in commodity materials in our everyday lives, as well as in specialty products.

Community Based Natural Resource Management in the IGAD Region May 24 2020

Thickening and Gelling Agents for Food Nov 29 2020 Thickening and gelling agents are invaluable for providing high quality foods with consistent properties, shelf stability and good consumer appeal and acceptance. Modern lifestyles and consumer demands are expected to increase the requirements for these products. Traditionally, starch and gelatin have been used to provide the desired textural properties in foods. Large-scale processing technology places greater demands on the thickeners and gelling agents employed. Modified starches and specific qualities of gelatin are required, together with exudate and seed gums, seaweed extracts and, most recently, microbial polysaccharides, to improve product mouthfeel properties, handling, and stability characteristics. These hydrocolloids have been established as valuable food additives as a result of extensive practical experience with different products. Nevertheless, the last few years have produced much additional research data from sophisticated new analytical methods. Information on the fine structure of these complex molecules has given a tremendous insight into the three-dimensional conformation of hydro colloids and their behaviour in solution. Critical components within the biopolymer have been identified which provide particular thickening, suspending, stabilising, emulsifying and gelling properties. Contributions for this book have been provided by senior development managers and scientists from the major hydrocolloid suppliers in the US and Europe. The wealth of practical experience within this industry, together with chemical, structural and functional data, has been collated to provide an authoritative and balanced view of the commercially significant thickening and gelling agents in major existing and potential food applications.

Local Governance in Africa Dec 19 2019 An exploration of why some decentralization reforms have led to viable systems of local governance in Africa, while others have failed. It outlines the key issues involved, provides historical context, and identifies the factors that have encouraged or discouraged success.

Marcel Breuer, Furniture and Interiors Jan 24 2023

Glycosphingolipids Signaling Sep 27 2020 This book presents the latest knowledge and the most recent research results on glycosphingolipid (GSL)-mediated signaling. GSLs are important constituents of the plasma membrane that exert their distinct functions through binding to certain functional proteins. They play a role in various human diseases and also function as human alloantigens. Cellular GSLs are associated with many biological functions such as cellular oncotransformation, phenotype change, neuronal or embryonic development, regulation of cell division, cell-cell interaction, cell attachment, adhesion, and motility, and intracellular signaling via protein-carbohydrate or carbohydrate-carbohydrate interactions. This book opens by providing the key background on GSL glycan-receptor interactions and mammalian GSL synthesis. Up-to-date information is then presented on all aspects of GSL-dependent signaling. Viral protein and bacterial toxin protein interactions with host cell GSLs are examined in depth, and the concluding chapter is devoted to signaling regulation. The book should assist in the further development of new strategies against emerging infectious agents and intractable diseases.

Spring Awakening (Songbook) Mar 14 2022 (Vocal Selections). Based on a controversial 1891 German play, Duncan Sheik and Steven Sater turned the story into an exciting rock musical that went on to win eight Tony Awards in 2007 including the coveted best musical. Our piano/vocal selections feature 17 of the songs, including: All That's Known * The Bitch of Living * The Dark I Know Well * I Believe * Mama Who Bore Me * My Junk * Those You've Known * Touch Me * The Word of Your Body * and more. This souvenir folio also includes great color photos from the Broadway production. PARENTAL ADVISORY: EXPLICIT LYRICS

Regime Hegemony in Museveni's Uganda Nov 10 2021 This is a study of the struggle for the restoration of legitimate power in Uganda following the 1986 National Resistance Army/Movement (NRA/M) liberation battle led by President Yoweri Museveni. It addresses the empirical consequences of legitimacy on power relations and how this affects democratization and economic progress.

The Soils of Italy Jul 06 2021 The Soils of Italy is the first comprehensive book on Italian pedology in seventy years. Taking advantage of the authors' large experience and of the most up-to-date information and technology, this book treats the main soil types of Italy, their diffusion, their functions, ecological use, and the threats to which they are subjected during centuries of intensive management. It also deals with future scenarios of the relationships between soil science and other disciplines, such as urban development, medicine, economics, sociology, and archaeology. The description of the soils is accompanied by a complete set of data, pictures and maps, including benchmark profiles. Factors of soil formation are also treated, making use of new, unpublished data and elaborations. The book also includes a history of pedological research in Italy, spanning over a century.
