Includes new information on the newest breed of fuel alternative and three-wheel bikes There are many ways of designing a motorcycle, but it takes a great deal of artistic sensitivity to create a legend from only two cylinders. That is exactly what Moto Guzzi, the prestige manufacturer in Mandello del Lario, has done. Active in motorcycle construction since 1920, particularly in the years after 1945 it created motorcycles that made history, especially those with the powerful V-twin engine installed lengthwise in the chassis. For forty years the V-twin four-stroke engine has been the Italian company's flagship. The fine Italians, Le Mans, and California types, and the small 125s, 250s and 350s are described here with accuracy and detail. This comprehensive volume describes all models and technical details. As is the style of the authors, they also provide background information about the company and the industry. It is not all about machines and horsepower, but also the people who put their stamp on the operations: not only a treat for fans of serious technical information, but a gripping story as well. This book tells the story of one of the world's most innovative, beloved, and famous motorcycle manufacturers on its 100th anniversary. In 1921, Giorgio Parodi founded Moto Guzzi with the mechanic Carlo Guzzi. The purpose of the company was to design innovative motorcycles in the Mandello del Lario headquarters on Lake Como, where the factory still stands today. Moto Guzzi bikes immediately stood out for their high performance and technical sophistication. Their greatness was proven by competition wins, and these sporting triumphs were accompanied by commercial success that made Moto Guzzi the most important motorcycle manufacturer in Italy. These victories did not happen by chance, but were the result of continuous innovation. The company soon decided to withdraw from competitions because of its "manifest superiority" and instead focused on production. It has since continued to churn out iconic innovations and models, like the California, which was chosen by the LAPD for their patrols. Moto Guzzi is no longer just a motorcycle but, like Harley-Davidson, it has become a style, a philosophy and a sign of belonging to the Guzzi tribe that unites movie stars like Ewan McGregor with acclaimed designers like Tom Dixon, musicians like Billy Joel, and astronauts such as Paolo Nespoli. Many books have been published about Italian motorcycles, but none has focused exclusively on the Italian motorcycle-based chopper, bobber, trike, and quad custom bike scene - until now. Even though customising is not normally associated with Italian brands, there are some fantastic individually-built Italian custom bikes out there, old and new. In recognition of the trend, Ducati entered into a new market segment when it launched its power cruiser Diavel in November 2010, while Moto Guzzi has its Aquila Nero range ... these and many other custom-style bikes have been well-received in the customs scene. This book looks at some of the fascinating custom projects around the world, accompanied by stunning photography of the finished bikes. A great book for Italian bike fans, and fans of the custom bike scene in general. Today, Moto Guzzi are among the world's most popular motorcycles. The Italian marque has been at the forefront motorcycle technology since the introduction in 1950 of the Falcone, once described as the most romantic 500cc in the world. This book provides all the appendices, pointers on model recognition, paint schemes, and hands-on tips that any restorer or enthusiast needs to know about engines, frames, electrics, suspension, wheels, brakes, and tires. The entire extended family of these Italian classics is covered: the T-series, Le Mans and Lario Sportsters, Strada tourers, Nevada and California custom cruisers, and Quota enduro machines.
