Team-Based Oncology Care: The Pivotal Role of Oncology Navigation Sep 03 2021 This book discusses how effective navigation requires a team approach to oncology care and should never be considered an “add-on” resource or service. The Academy of Oncology Nurse & Patient Navigators (AONN) is the only national professional organization for navigation professionals, and has more than 6,000 members, 90% of which are oncology nurse navigators. They are the experts on creating team-based programs, which remove the risk of others trying to reinvent the wheel by designing a navigation program from scratch. They also understand the role of effective navigation across the entire continuum of care, and understand and are able to apply other key aspects of navigation, including clinical trial screenings and tumor board coordination and monitoring, as well as measurement using evidence-based navigation metrics, to name but a few. It is the only book designed to educate and support anyone developing a new navigation program, or wanting to improve one they have created. As such it offers a guide for cancer centers needing to develop and implement an oncology navigation program; understand and successfully meet and exceed the Commission on Cancer accreditation standards linked to navigation; expand or improve their current navigation program as well as demonstrate its value using reliable measurable results, including patient satisfaction and improved-quality clinical outcomes. This comprehensive book also provides insights into applying the information presented to the real world of oncology care.

The Cancer Patient and Supportive Care Aug 22 2020 During the course of editing 'Supportive Care in Cancer Therapy' (Martin us Nijhoff Publishers, 1983), it become apparent that several topics would have to await a second volume. Furthermore, development of new informa tion and evolution of ideas continues. This volume continues the intent of the first to present reviews of issues relating to supportive care, and to identify areas where further definition and further research is needed. The physician reading this volume will find the contents though-provok ing. In addition to reviews authored by physicians, there are chapters authored by non-physicians, who present a different perspective and a dif ferent style of writing. Reverend Bigler writes from his long experience as a chaplain for cancer patients, and tries to identify the changes that take place in the personality of the chaplain who works with dying patients. Ms. Kil lion and Ms. Powell try to describe what an Oncology Nurse is, rather than what one does. Attorneys Reese and Price present a very practical summa tion of issues which face the cancer patient, and their chapter could easily be copied and offered to one's patients; furthermore, this chapter gives direc tion to the physician who is frequently called upon for advice regarding issues which lie entirely outside his/her formal training. Excellent reviews on more' medical' subjects are here. 'Cancer in the Elderly' should provoke oncologists to re-examine their approach to the geriatric patient.

Access Device Standards of Practice for Oncology Nursing Jan 15 2020 "The use of venous access devices (VADs) is central to the care that nurses provide to patients with cancer. Oncology nurses must base their practice on evidence-based research when available, but a lack of evidence has been a professional challenge for decades. With limited research to guide practice, ongoing controversies remain regarding optimal device management. Since 1989, the Oncology Nursing Society (ONS) has provided guidelines to establish a foundation for access device management. With this new text, ONS has identified practice standards, developed from a synthesis of evidence, critical review, and analysis of aspects of access device management for which nursing is accountable. *Access Device Standards of Practice for Oncology Nursing* reviews the controversies in access device care, explores the range of devices currently available, details the advantages and disadvantages of each device to ensure optimal selection based on patient needs, and discusses the key legal ramifications concerning access devices and their management. With access device technology becoming more complex, this text is an essential resource for nurses practicing in a wide range of settings to ensure safe, effective care of patients with VADs."-- Publisher's description.

Perspectives in Paediatric Oncology Nursing Dec 06 2021 Originally emanating from presentations at an international conference, this text brings together research and practice development from three perspectives: practice, management and education. Within these three sections the book presents a series of chapters written mainly by practitioners, but some in collaboration with academics. At the end of each section there is a commentary by a practitioner, manager or researcher, which aims to offer a helpful critique on the papers in their section, guiding the reader to consider other areas of research and practice development. At a time when practitioners are being called to produce and use evidence in their practice, this book should offer a valuable contribution to that evidence base.
