Haynes offers the best coverage for cars, trucks, vans, SUVs and motorcycles on the market today. Each manual contains easy to follow step-by-step instructions linked to hundreds of photographs and illustrations. Included in every manual: troubleshooting section to help identify specific problems; tips that give valuable short cuts to make the job easier and eliminate the need for special tools; notes, cautions and

warnings for the home mechanic; color spark plug diagnosis and an easy to use index. This repair manual covers Yamaha XJ650 UK 1980-1984; XJ650 Maxim US 1980-1983; XJ650M Midnight Maxim US 1981; XJ650R Seca US 1982; XJ750 UK 1981-1984; XJ750 Maxim US 1982-1983; XJ750M Midnight Maxim US 1983; and XJ750R Seca US 1981-1983. Unit construction, 649cc, 747cc. With 340 pages, and more than 500 illustrations and charts, size 8.25 x 10.75 inches, this is possibly the most complete workshop manual for the Alfa Romeo 750 & 101 series of automobiles. It includes: A reprint of the September 1958 factory Workshop Manual (No.637). The 12-page 'Transmission Appendix' from the December 1957 manual (No.611). The 15-page 1962 'Enclosure to the Shop Manual-Technical Characteristics' (No.854) plus the 1963 and 1964 'Technical Characteristics' publications for the 1600cc models (27 pages). Introduced in 1954, the initial 750 Series Giulietta was replaced by the 101 Series Giulietta in 1959. Both the 750 and 101 models were powered by a 1300cc (1290cc) engine. The engine capacity was increased in 1962 with the introduction of a 1600cc (1570cc) unit. Co-incident with this engine update, the Giulietta name was changed to Giulia, although they still retained their original 101 Series designation. From 1962 onwards, the updated Giulietta continued to be sold under the Giulia name until they were replaced by the all-new 105 Series Giulia-based models in 1965. As the predominance of the basic mechanical components of the 750 and 101 models remained unchanged during their 1954-1965 production run, the original Giulietta workshop manual was considered adequate and the factory supplemented it with the publication of 'Technical Characteristics' booklets (1963 & 1964) that updated the Factory manual with technical data specific to the 1600cc equipped cars. Timeline of the English language manuals issued by the Alfa factory for the 750 & 101 Series Giulietta and Giulia models: The first English language Workshop Manual (Part No.577 - 600 copies) was issued in May 1957 and it consisted of 14 individual booklets in a ring binder. In addition, a separate booklet numbered 15 was added a little later that was identified as 'Special Repair Data for the 'Sprint Veloce, Spider and Super Spider'. In December 1957, Alfa issued 1000 copies of a softbound workshop manual (Part No.611) that combined the booklets from the May 1957 publication into a single volume. It should be noted that booklet 14 'Special Tools and Equipment' was omitted from this edition and that the images are of poor quality. In September 1958, another 1000 copies of a softbound single volume manual (Part No.637) was issued and the images in this manual are almost photo quality. This edition also included the previously missing 'Special Tools' section. However, for some unknown reason the 12-page appendix to the transmission section from the December 1957 edition was omitted. This same part number (637) was reprinted by the factory in September 1961 (1000 copies). Finally, in November 1962, Alfa issued 2000 copies of a 15-page booklet 'Enclosure to the Shop Manual - Technical Characteristics' (Part No.854). This booklet expanded the technical data for the 1300cc models that was previously included in 'Technical Specifications' section of both the ring bound and softbound workshop manuals. However, in 1962, the Giulietta sport models: Sprint, Sprint Special and Spider were fitted with the new 1600cc engine and the Giulietta Series 101 name was dropped but they continued to be sold under the Giulia name (as 101 Series vehicles) until they were replaced by the all-new 105 Series Giulia-based models in 1965. Consequently, for the sake of completeness, the 20-page October 1963 'Technical Characteristics' booklet (Part No. 955 -1000 copies) for the 1600cc Giulia Ti, Spider & Sprint and the 7-page October 1964 'Technical Characteristics' for the Giulia Spider Veloce should be a required addition to this list of manuals for the 750 and 101 Series models. At the time of Floyd Clymer's unexpected demise in 1970, there were a number of manuals that had been completed and were ready for publication; this Honda CB750 is one of those manuals. When the original manual was compiled in either late 1969, or early 1970, it was only applicable to the first series of 1969/70 S.O.H.C. CB750 (Sandcast) and CB750K0 models and minor changes to these early models are noted in the text. However, detailed information on these changes (and subsequent changes) have been updated, by the addition of supplements, that cover the 1971 to 1978 CB750K (K1 K8) series plus the 1975 to 1978 CB750F (F0 F3) models. There were a number of 'running changes' made throughout the 10-year production run of these models and, in order to provide information applicable to those changes, the appropriate supplements are appended to the rear section of this manual. Prior to commencing any work the reader is encouraged to review those supplements with regard to applicable engine number notations as whenever engine numbers are stated, all specifications, maintenance and repair instructions will be specific to that particular series. Beginning in 1968 and extending through the 1975 model year, the 'K' suffix often, but not always, changed on an annual basis. 'K0' was normally used to indicate the first model in the series with updated

versions identified as K1, K2, K3 etc. While the 'K' number designations continued in use outside the USA through 1978, in September 1973, American Honda adopted a year identifier within the model number - for example; a CB750K'76 would be a 1976 USA model but in most other countries that same model would be identified as a CB750K6. Setting this potential for confusion aside, we can state that this manual covers the 1969 through 1978 S.O.H.C. CB750K and CB750F models. The CB750 was a true 'superbike' but it was also readily available and reasonably priced. After its initial launch in 1969, the CB750 remained in production (virtually unchanged) through 1978. With a 10-year production run of approximately 450,000 units, no one could have anticipated that it was destined to become a collector's item. Consequently, we are pleased to offer this updated and expanded version of the original Floyd Clymer manual as a service to all 750cc S.O.H.C. Honda owners, enthusiasts and restorers worldwide. Finally, please note that the text in the original manual was translated from Japanese into English. Consequently, some of the phrasing, grammar, punctuation and word usage may be subtly different from that commonly used in the English language. However the information, as presented, is readily understandable. In addition, while we have done our best to identify any anomalies and errors that may have occurred during the original translation process, we are certain that we will have missed one or two and we request your indulgence in ignoring them. This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work. There is a Haynes manual for most popular domestic and import cars, trucks, and motorcycles. By conducting complete tear-downs and rebuilds, the Haynes staff has discovered all the problems owners will find in rebuilding or repairing their vehicle. Documenting the process in hundreds of illustrations and clear step-by-step instructions makes every expert tip easy to follow. From simple maintenance to trouble-shooting and complete engine rebuilds, it's easy with Haynes. 172 pages, and more than 140 illustrations and charts, size 8.25 x 10.75 inches. Owners of Norton Commando motorcycles are subjected to considerable confusion surrounding the selection of an appropriate workshop manual from the multitude of originals and reprints that have recently flooded the on-line marketplace. Many of the reprints found on internet websites are from 'bedroom sellers' at enticingly low prices by individuals that really have no idea what they are selling. Many are nothing more than poor quality comb-bound photocopies that are scanned and printed complete with greasy pages and thumbprints and, as such, are deceptively described as 'pre-owned'. In addition, they are often advertised for the incorrect series and/or model years of motorcycles. The Norton Commando model range is especially subjected to incorrect identification by these 'bedroom sellers' and you are encouraged to read the paragraph below to help identify the correct manual for your model. During the 1968 to 1978 Commando model run there were 4 different manuals published by the

factory: The original 52 page 750cc manual (part number 06-3062) is applicable to the 1968 to 1970 models ONLY that were fitted with the external rev-counter drive and/or the Atlas style exhaust (refer to ISBN 9781588502421). This original manual was followed by part number 06-3419 which covers the 1970 to 1973 750cc models ONLY. The next, and most comprehensive manual, part number 06-5146, was published in 1973 and the 850cc data was added making this manual applicable to the entire range of 750cc & 850cc models from 1970 to 1975. Finally, with the introduction of the electric start, left side gear change, rear disc brake Mark 3 models in 1975, a separate manual part number 00-4224 was published which is specific to the 1975 to 1978 MKIII 850cc series from engine no. 325001 & frame no. F125001. We are pleased to offer this reproduction of the Factory Workshop Manual 06-5146 to owners of the 1970 through 1975 models and we hope that the explanation above removes any doubt regarding which manual is correct for a particular series of Norton Commando model. Models and model years covered in this manual are: Interstate: 745cc 1972-1973 & 828cc 1973-1975 Roadster: 745cc 1970-1973 & 828cc 1973-1975 Hi-rider: 745cc 1971-1973 & 828cc 1973-1975 Interpol: 745cc 1970-1973 & 828cc 1973-1975 Fastback: 745cc 1970-1973 Fastback LR (Long Range): 745cc 1971-1972 S Type: (Scrambler) 745cc 1970 SS Type (Street Scrambler): 745cc 1970-1971 IMPORTANT: Owners of 1968-1970 750cc Commando models are directed to our workshop manual ISBN 9781588502421 and owners of the later MKIII models would require our 1975-1978 manual ISBN 9781588502445.
