Underwater Cultural Heritage Oct 11 2019 Underwater Cultural Heritage investigates cases of underwater cultural heritage, exploring ethical issues that have never been studied before. A vast cultural heritage lies beneath the sea, including the archaeological remains of more than three million vessels, as well as historic monuments and whole cities. In addition, climate change, population growth and current events around the world mean that new underwater cultural heritage is being created faster than ever before. It is, therefore, essential that the ethical issues related to the management of such heritage are considered now, especially as decisions made now will bestow the heritage with a value and will establish legal frameworks that could be used either to protect or harm underwater heritage in the future. Considering a range of challenges related to underwater cultural heritage - including preservation, management, use, sustainability, valuation, politics, identity, human rights, and intangible heritage - the book presents case studies that both illustrate the key ethical issues and also offer possible solutions to help navigate such challenges. The book will also explore the various legislative instruments protecting underwater cultural heritage and emphasise the importance of revising and updating legal frameworks, whilst also taking into account ethical concerns that may expose cultural heritage to more serious menaces. Underwater Cultural Heritage draws on case studies from around the globe and, as such, should be of great interest to academics, researchers and students working in heritage studies, archaeology, history, politics and sustainability. It should also be appealing to heritage practitioners and policymakers who want to learn more about the issues surrounding not only management of underwater cultural heritage but management of cultural heritage in general.

Contemporary Issues in Cultural Heritage Tourism Jan 18 2023 The perceived quality of a destination's cultural offering has long been a significant factor in determining tourist choices of destination. More recently, the need to present touristic offerings that include cultural experiences and heritage has become widely recognised, that this aspect of the tourism experience is an important differentiator of destinations, as well as being amongst the most manageable. This has also led to an increase in the management of such experiences through special exhibitions, events and festivals, as well as through ensuring more routine and controlled access to heritage sites. Reflecting the increasing application of cultural heritage as a driver for tourism and development, this book provides for the first time a cohesive volume on the subject that is theoretically rich, practically applied and empirically grounded. Written by expert scholars and practitioners in the field, the book covers a broad range of theoretical perspectives of cultural heritage tourism; regeneration, policy, stakeholders, marketing, socio-economic development, impacts, sustainability, volunteering and ICT. It takes a broad view, integrating international examples of sites, monuments as well as intangible cultural heritage, motor vehicle heritage events and modern art museums. This significant book furthers knowledge of the theory and application of tourism within the context of cultural heritage and will be of interest to students, researchers and practitioners in a range of disciplines.

On Theoretical and Ethical Principles in Conservation Jan 14 2020 In 2003, Salvador Muñoz Viñas published 'Teoría contemporánea de la Restauración'. Two years later, he wrote 'Contemporary Theory of Conservation', a different, revised version of the first work. In these books, the philosophy of conservation was analyzed, and, building from different authors and sources, an alternative approach was outlined. Since 2005, the author has continued working on this topic, revising the ideas presented in these books, and developing new ones. Many of these ideas were presented in papers or in lectures. 'On Theoretical and Ethical Principles of Conservation' gathers together fifteen of these contributions. While the papers and lectures included in this volume were not conceived as part of a whole, a coherent line of thinking can be easily detected: in all of them, the core notions of conservation ethics are discussed and analyzed. In different ways, they all aim at showing that, simply put, the so-called "principles of conservation" are not what they may seem at first sight. Heritage conservation is a well-established activity in many societies -- an activity that does work, and that serves its purposes in an overly successful way; however, the reflections presented in this volume suggest that conservation might benefit from a different, less traditional interpretation of some of its ethical and theoretical tenets.

Communities and Cultural Heritage Dec 17 2022 *Communities and Cultural Heritage* explores the relationship between communities, their cultural heritage and the global forces that control most of the world's wealth and resources in today's world. Bringing together scholars and heritage practitioners from nine countries, this book contributes to the ongoing dialogue on community heritage by analysing impediments to full community participation. The underminin of local communities comes at a high price. As the chapters in this book demonstrate, the knowledge embedded within traditional and Indigenous heritage creates communities that are more resilient to environmental and social stressors and more responsive to contemporary challenges such as climate change, environmental degradation, post-disaster recovery and relocation. Cultural heritage practices often fail to capitalise upon local knowledge and traditional skills and undervalue the potential contribution of local communities in finding creative and resourceful solutions to the issues they are confronting. Arguing that the creation of successful community heritage project requires ongoing reflection on the aims, methods, financing and acceptable outcomes of projects, the volume also demonstrates that the decolonization of Western-focussed heritage practices is an ongoing process, by which subaltern groups are brought forward and given a space in the heritage narrative. Reflecting on trends that impact communities and heritage sites across different geographical regions, *Communities and Cultural Heritage* will be of interest to academics, students and practitioners of cultural heritage, archaeology and anthropology around the world.
